At this stage, some of this will still be group work, with a focus towards writing the investigation down becoming more apparent. Teachers must use this as a guide to prompt. Not everything must be recorded. If using sentence starters as a writing frame, personalise to align with your investigation and your groups of learners. Please remember HAKA.

Link to HAKA	Teacher Guide	Child Prompts	Recording <i>*Optional</i>
Hook - This must excite and inspire the learners. Must engage their interest and drive them to want to learn more! Must make question explicit.	Could use dramatic video, multisensory activity, practical, hands on session, a letter to class etc and has a wow factor! (Always use outdoors if possible) Involve children in formulating a question to investigate from the start!	What do you know about this? What questions does this make you think of? What could we try and find out?	<u>Question for Investigation</u> (could be refined later)
Authentic - use materials exposing pupils to high quality text and information from the real world, making their learning relevant beyond the school gates.	Question pupils to draw out key information which will support the investigation. Must focus on key words that will be the focus for research.	What are the important bits of this? What does this tell us? What words are unfamiliar? What do we need to find out more about?	Collaborative document (Either on IT/Board/A3)
Knowledge - Through both teaching and opportunities for research, ensure learners acquire the knowledge and concepts they need to move their learning forward. This must be targeted from the authentic information and to support the investigation or question.	This must be collaborative eg. Collate facts on a class board, or a digital collaborative document. Children can read facts from others not to repeat. (Not copying facts into books)	What other facts can you find out? What important words did we hear in the video/read in the book? Where else could you find information? Why will this information help you?	<u>Research</u> I have found out these things about

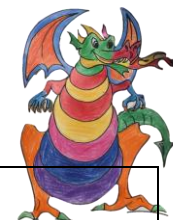

"Grow, Learn Succeed Together!"
Inspiring our children to be the best they can be!

		Explain this information with a friend...	
<p>Application - provide the learners with opportunities to apply their knowledge and understanding through planning their investigation, keeping all pupils in their challenge zone. Children should be working collaboratively.</p>	<p>Planning: What are our success criteria? What are the instructions for our investigation? How will we make this a fair test? What will you need to keep the same? What will we measure?</p> <p>Prediction: What do you think will happen? Why do you think that?</p> <p>Diagram: Can you label all the important parts? Have you included all the equipment?</p> <p>Results: How can record your results?</p> <p>Conclusion: What did you notice about the results ? What does this tell us? Can you see a pattern?</p> <p>Reflecting: What worked well? What didn't work well? Why? If you did this again, what would make it better? Where could this information be used in the real world?</p>	<p>Planning I will need I will change I will keepthe same I will measure</p> <p>Prediction I think</p> <p>Diagram</p> <p>Results Table and graph</p> <p>Conclusion I found out that...</p> <p>Reflecting What did/did not work</p>
