

Solve problems with division

1 Use the part-whole models to help work out the divisions.

a) $450 \div 3 =$

c) $1,884 \div 6 =$

b) $2,639 \div 13 =$

d) $32,672 \div 32 =$

2 Complete the function machines.

What do you notice?

3 Sort the divisions into the table.

$984 \div 4$	$2,815 \div 4$	$68,000 \div 21$
$6,493 \div 6$	$68,000 \div 20$	$21,000,000 \div 7$

Solve with mental strategy	Solve with written method
<div></div>	<div></div>

Compare answers with a partner.
Work out the answer to each division using your chosen method.

- 4 Eggs are packed in boxes of either 8 or 12
There are 960 eggs.
All the eggs need to be packed into the same size boxes.
How many of each type of box are needed?

<input type="text"/>	boxes of 8
<input type="text"/>	boxes of 12

- 5 A coach can seat 24 people.
768 supporters are travelling to a rugby match by coach.
How many coaches are needed to transport all the supporters?

6

Dora

To divide by 8,
I can divide by 2,
divide by 2 again and
divide by 2 again.

Tiny

To divide by 6,
I can divide by 2,
divide by 2 again and
divide by 2 again.

Who do you agree with?

Explain your reasons to a partner.

7

Label the sorting diagram with the divisions.

The first one has been done for you.

- | | | | |
|------------------------|------------------------|------------------------|------------------------|
| A $901 \div 16$ | C $910 \div 16$ | E $901 \div 17$ | G $910 \div 17$ |
| B $902 \div 16$ | D $920 \div 16$ | F $902 \div 17$ | H $920 \div 17$ |

8

1	2	3	4	5
---	---	---	---	---

Use each digit card once to complete the division in different ways.

<input type="text"/>	<input type="text"/>	<input type="text"/>	\div	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	--------	----------------------	----------------------

Experiment to find divisions that give:

- a) the smallest possible remainder
- b) the greatest possible remainder
- c) a remainder that is a multiple of 5
