7 What numbers are the arrows pointing to?

2 marks

8 What is the smallest digit that can be used to make this statement correct?

$$34,3_8 > 34,359$$

1 mark

9 Here are three digit cards.

Use each card once to make the statement correct.

$$\square \square \square > \square \square \square$$

The equation shows a sequence of three boxes followed by a greater-than sign and another sequence of three boxes. The second box of the first sequence contains the digit 0, the third box contains the digit 3, and the first box of the second sequence contains the digit 8.

Arrange all 6 cards to make a number between 395,000 and 425,000
